**REPOSSESSIONS • COLLECTIONS • SKIP TRACING • COLLATERAL LIQUIDATION**  
**REMARKETING OF YOUR COLLATERAL IS OUR EXPERTISE.**

**After careful review of:**

**" The National Skip Tracer's Certification Program "**

**Authored by Alex Price in his latest book I would like to endorse this periodical. Alex Price has**

**a complete and common sense approach regarding the needs of a student in regard to finding lost people . This part of the book is excellent in its total concepts which include common sense as well as the need for all knowledge**

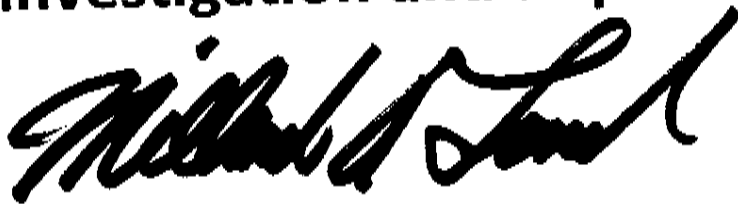

**of electronics and computers. After 40 years of finding the worst of all credit fraud individuals I can say that Price has it correct. Skip tracing began many decades ago and at that time one had to be in the mind set and have the same capabilities of the criminal he was chasing down. The best of the best had to develop the habits and lies that were used by the criminal he was following. The game was about using the same cons and lies toward family and friends of the subject and applying them in order to beat him. A skip tracer had to cross many grey lines that ( if caught) might result in criminal charges. As the current century**

**arrived those tools may longer be used. All of the fraud investigation society has weakened in those verbal human contact capabilities because they have fallen into the lull of the push button computer world.**

**Alex Price has worked in multiple decades that he addresses in his writing . He leads the student to a complete lesson that is needed for total understanding of the current laws and risks that cannot be taken in a court room directed society. No true professional skip tracer would ever jeopardize a client by using phone toll breaks or ambulance gags of the past century.**

**My life has always been 100% in skip tracing for 40 years.**

**Alex has been a friend for 30 years and I feel he brings a great deal to our industry . Any company or individual must include this book in order to provide a total education of fraud investigation and skip tracing .**
